Schnabel Engineering DC, Inc. is an affiliate of Schnabel Engineering, Inc.

Engineering services in the following states are performed by Schnabel's respective affiliated entity: Michigan: Schnabel Engineering of Michigan, Inc.; New York/Connecticut: Schnabel Engineering of New York; North Carolina: Schnabel Engineering South, P.C.

Governmental building and infrastructure projects often bring special challenges and requirements, including unique administrative, procedural, and security protocols. Schnabel is intimately familiar with the particular regulatory and procurement requirements of different governmental entities and has proven to be adept at responding to the distinct needs of our federal, state, and local clients.

We conduct all of our business with a high level of confidentiality and have a demonstrated history of quick and efficient mobilization, even to remote regions overseas, including zones of unstable security. With a track record that positions us as a favored engineering services provider, we have numerous indefinite delivery contracts with the Department of Defense, State Department, and state and local governments, including many that resulted in multiple contract renewals.
