Schnabel Engineering DC, Inc. is an affiliate of Schnabel Engineering, Inc.

Engineering services in the following states are performed by Schnabel's respective affiliated entity: Michigan: Schnabel Engineering of Michigan, Inc.; New York/Connecticut: Schnabel Engineering of New York; North Carolina: Schnabel Engineering South, P.C.

Schnabel is recognized as a specialty provider for development, design, and construction management of hydroelectric projects across the U.S., with many in remote locations. We are unique in that we have offices with professionals that work exclusively on dam projects throughout the country. Our engineers prefer the hands-on approach, and value long-standing relationships.

Working with owners, engineers, and contractors, including companies such as Alaska Electric Light and Power (AEL&P), Dominion Energy and Consumers Energy, we have been an integral part of the teams that successfully bring these projects online.
